

# Seaqueue Cheng

(425)615-2688 | Boston, MA 02119 | [cheng.gian@northeastern.edu](mailto:cheng.gian@northeastern.edu) | [My Website and Work](#)

Availability: May. 2024

## Education

**Northeastern University**, Boston, MA

Sept. 2020 – May 2024 (expected)

**Major in Computer Science at Khoury College**

Coursework: Object-Oriented Design | Cybersecurity of Computer Systems | Network and Distributed Systems  
Math Reasoning | Calculus 3 | Digital Design and Computer Organization | Programming Language

**University of Massachusetts Boston**, Boston, MA

Sept. 2018 – May 2020

Coursework: Data Structures (Java) | Programming in Python & C | Linear Algebra | Calculus 1 & 2

Honors: Merit Scholarship (Oct. 2019) | Dean's List (Jan. 2020)

Tutor: Held 11 hours per week of one-on-one tutoring for two semesters (Calculus 1 & Data Structures - Java)

## Computer Toolkit

Tools: Java | Python | React (HTML + CSS + JS/TS) | Ruby | Racket | Lean | C | Assembly | Pandas | Plotly  
PostgreSQL | SQLAlchemy

Software: MacOS | GitHub & GitLab | IntelliJ | PyCharm | VS Code | Jupyter

## Experiences

**Global Nursing Talent Inc.**

Full Stack developer, CO-OP: [GNT](#)

Aug. 2023 – Dec. 2023

- Developed the website in Ruby from scratch to production that helps the company to recruit the first nurse at least 3 months earlier.
- Set up multi-login, dashboard, progress-bar and languages switching between English and Spanish to fit the company's new target clients in Mexico, Singapore, Canada and Chile.
- Created searching, filtering and granting features on candidates for admin that help the managers plan ahead the priority of recruiting candidates.
- Stored text-based info to PostgreSQL, and files/images to AWS; Streamlined overall UI/UX with Bootstrap.

**Quantitative Trading – Start up**

Nov. 2022 – Present

- Working with a financial peer to create a Quant Trading program in Python.
- Analyzed and visualized industries and further, industries members on data like PE and Total Capital with Plotly that helped us to filter out industries and specific companies within the industry to perform back test on.
- Organized data with Pandas-DataFrame and CSV files (converting data to dictionary to trade for time).
- Predicted price trends using Machine Learning -- Regression, Classify, Clustering, and Time Series models.

**Seminaut Inc, San Marcos, TX**

Full Stack developer, CO-OP: [Guild Gaming](#)

July 2022 – Dec. 2022

- Pushed the website to the next version by implementing events information, pagination, badge System, filtering on events, venues and articles which all involve taking user inputs, saving, and fetching data to and from the SQLAlchemy database through API calls.
- Promoted to group leader of 9 teammates since Oct. 2022. Led the team to design and implemented interactive Post System that users can share texts and images with followers and the basic Bracket System for tournaments.

## Projects

Neural Network: Followed the book "Neural Network from scratch in Python" by Harrison Kinsley & Daniel Kukiela to implement Neural Network models, and created bird view graph in [NN Graph](#).

Covey Town: Set up PostgreSQL; implemented REST API calls; created profile and login system.  
Created badges system that requires transfer information through socket and API calls.  
Deployed frontend on Netlify and backend on Heroku. [Covey Town](#)

## Interests

Basketball | Kickboxing | Soccer | Planking | Rubik's Cube
